

USAGE: Take 1 capsule per day with meal, or as directed by your qualified health consultant.

PyridoxAll™ contains a blend of the three naturally occurring forms of the water-soluble vitamin B6: pyridoxine, pyridoxamine, and pyridoxal. These forms of B6 have all been found in brewer's yeast dietary supplements.¹ (The dominant form is pyridoxamine). In the body, B6 is found mostly in the liver, (primarily as pyridoxamine), and muscle tissue (primarily as pyridoxal). Pyridoxine is utilized by the liver to synthesize pyridoxal phosphate (PLP), the active coenzyme form. PLP functions as transamination and decarboxylation coenzymes, which are involved in amino acid and protein metabolism. Alcohol impairs vitamin B6 metabolism in the body.*

Keep out of the reach of children.
